RE: Property: 30 Parmenter Dr.

Libby, MT 59923

Name: Debbie & John Loomis

File No. DA-603

Case No.

#### Dear Courtney

In accordance with your request, I have personally inspected and prepared an appraisal report of the real property located at:

30 Parmenter Dr.

The purpose of this appraisal is to estimate the market value of the property described in the body of this appraisal report.

Enclosed, please find the appraisal report which describes certain data gathered during our investigation of the property. The methods of approach and reasoning in the valuation of the various physical and economic factors of the subject property are contained in this report.

An inspection of the property and a study of pertinent factors, including valuation trends and an analysis of neighborhood data, led the appraiser to the conclusion that the market value, as of 7/1/03 is:

\$ 82,000

The opinion of value expressed in this report is contingent upon the limiting conditions attached to this report.

It has been a pleasure to assist you. If I may be of further service to you in the future, please let me know.

Respectfully submitted,

Tim Rooney
Jay Dinning

Additional features (special energy efficient items, etc.):

Condition of the improvements, depreciation (physical, functional, and external), repairs needed, quality of construction, remodeling/additions, etc.:

Improvements in state of neglect and deferred maintenance. Home in need of overall cleaning, replacement of some items of general maintenance. Appraiser instructed to view damaged ceiling in kitchen as if repaired. Home of good quality construction.

Adverse environmental conditions (such as, but not limited to, hazardous wastes, toxic substances, etc.) present in the improvements, on the site, or in the immediate vicinity of the subject property.: Per EPA, home has vermiculite in the plaster walls and ceiling. Evidence of water damage in basement. See environmental addendum.

#### GENERAL COMMENT ADDENDUM

Unless otherwise stated this appraisal was made to determine the estimated market value of the subject property for purchase, finance or settlement purposes. It must not be considered a building inspection. The appraiser can not guarantee that any homes, buildings or other improvements will be satisfactory in all respects or that all equipment will operate properly. A thorough inspection of the property by a reputable home inspection firm may help minimize any problems that could arise. In an existing home, particular attention should be given to plumbing, electrical and roofing components.

Most of the subject area market is not zoned and has little or no tract housing. Historically houses are custom built and are original and unique unto themselves.

This factor and the small number of sales because of the small area population makes it necessary to use comparables that are dissimilar in size, construction, location, etc. Therefore, the adjustments are greater than recommended. This is typical & customary of the subject area.

Because there is little or no tract housing in the area and most homes are and have been custom built, it is necessary that dissimilar properties be used and the adjustments made from a market value approach as the basis for the appraisal; i.e., to determine the estimated market value using the comparable sales approach. It is further necessary that the appraiser use subjective reasoning with the understanding no method of appraising is an exact science. This is typical & customary of the subject area.

In this report, all area sales recorded in last 12 months were analyzed and sales used considered to best represent the market of the subject. Emphasis was placed on comparables deemed by the Appraiser to be most similar or best representative of the subject market.

Lincoln County, in which the subject is located, is that part of northwest Montana along the Idaho-Montana border from the Canadian border south some 60 miles and east 50 miles. It is estimated to be 70% U.S. Forest Service land and 15% owned by large timber companies, etc. Therefore, there is something like 15% private ownership.

The economic base is derived, in the most part, from natural resources of the United States Forest Service.

County Lincoln State MT Zip Code59923

Address 501 Mineral Ave., Libby, MT 59923

File No. DA-603

#### **ENVIRONMENTAL DISCLAIMER ADDENDUM**

Unless otherwise stated in this report, the existence of hazardous materials, which may or may not be present on the property, was not observed by the appraiser. The appraiser has no knowledge of the existence of such materials on or in the property.

The appraiser, however, is not qualified to detect such substances. The presence of substances such as asbestos, urea-formaldehyde foam insulation, molds, and other potentially hazardous materials may affect the value of the property.

The value estimated is predicated on the assumption that there is no such material on or in the property that would cause a loss in value.

No responsibility is assumed for such conditions or for any expertise or engineering knowledge required to discover them.

The client is urged to retain an expert in this field, if desired.

The Environmental Protection Agency is currently in the Libby area facilitating the cleanup of asbestos contamination caused by the now closed vermiculite mine. Many homes have been found to contain a higher than normal concentration of asbestos fibers in the homes and yards. In most cases, the cleanup involves removal of the vermiculite insulation in the homes, removal and replacement of carpeting or other improvements to the home, and excavation and removal of the vermiculite laden soils.

In this appraisal, the EPA has indicated to the appraiser that the subject home has been found to contain asbestos fibers intermixed with the plaster walls. The EPA has determined that the cleanup costs to the subject will possibly be in excess of the value of the home. Therefore a complete demolition of the home may be less costly than reparations. This appraisal, and the final opinion of value, has been based on as if the subject were in an average condition and exposed to the open market for the typical marketing time for the area.

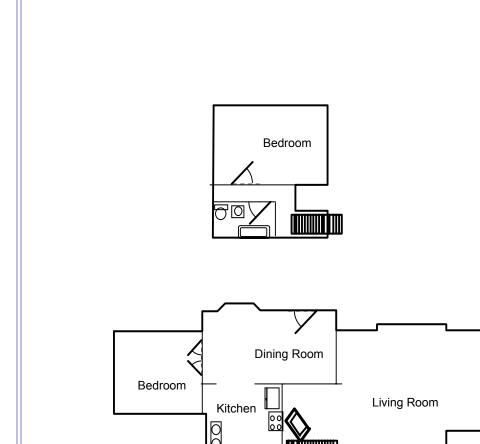

The appraiser has viewed the subject property and noted much deferred maintenance in the home. Therefore the appraiser has used a condition of "fair" in the the adjustment grid of the comparable sales approach but has not noted repairs specifically necessary to bring the home into an average condition, as repairing the home does not appear to be an avenue that may be pursued.

**DEFINITION OF MARKET VALUE:** The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he considers his own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with the sale.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

#### STATEMENT OF LIMITING CONDITIONS AND APPRAISER'S CERTIFICATION

**CONTINGENT AND LIMITING CONDITIONS:** The appraiser's certification that appears in the appraisal report is subject to the following conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- 2. The appraiser has provided a sketch in the appraisal report to show approximate dimensions of the improvements and the sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size.
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.
- 5. The appraiser has estimated the value of the land in the cost approach at its highest and best use and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used.
- 6. The appraiser has noted in the appraisal report any adverse conditions (such as, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property or adverse environmental conditions (including the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.
- 7. The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- 8. The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice.
- 9. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that completion of the improvements will be performed in a workmanlike manner
- 10. The appraiser must provide his or her prior written consent before the lender/client specified in the appraisal report can distribute the appraisal report (including conclusions about the property value, the appraiser's identity and professional designations, and references to any professional appraisal organizations or the firm with which the appraiser is associated) to anyone other than the borrower; the mortgagee or its successors and assigns; the mortgage insurer; consultants; professional appraisal organizations; any state or federally approved financial institution; or any department, agency, or instrumentality of the United States or any state or the District of Columbia; except that the lender/client may distribute the property description section of the report only to data collection or reporting service(s) without having to obtain the appraiser's prior written consent. The appraiser's written consent and approval must also be obtained before the appraisal can be conveyed by anyone to the public through advertising, public relations, news, sales, or other media.

#### APPRAISER'S CERTIFICATION: The Apprais

- The Appraiser certifies and agrees that:
- 1. I have researched the subject market area and have selected a minimum of three recent sales of properties most similar and proximate to the subject property for consideration in the sales comparison analysis and have made a dollar adjustment when appropriate to reflect the market reaction to those items of significant variation. If a significant item in a comparable property is superior to, or more favorable than, the subject property, I have made a negative adjustment to reduce the adjusted sales price of the comparable and, if a significant item in a comparable property is inferior to, or less favorable than the subject property, I have made a positive adjustment to increase the adjusted sales price of the comparable.
- 2. I have taken into consideration the factors that have an impact on value in my development of the estimate of market value in the appraisal report. I have not knowingly withheld any significant information from the appraisal report and I believe, to the best of my knowledge, that all statements and information in the appraisal report are true and correct.
- 3. I stated in the appraisal report only my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the contingent and limiting conditions specified in this form.
- 4. I have no present or prospective interest in the property that is the subject to this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or the estimate of market value in the appraisal report on the race, color, religion, sex, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property.
- 5. I have no present or contemplated future interest in the subject property, and neither my current or future employment nor my compensation for performing this appraisal is contingent on the appraised value of the property.
- 6. I was not required to report a predetermined value or direction in value that favors the cause of the client or any related party, the amount of the value estimate, the attainment of a specific result, or the occurrence of a subsequent event in order to receive my compensation and/or employment for performing the appraisal. I did not base the appraisal report on a requested minimum valuation, a specific valuation, or the need to approve a specific mortgage loan.
- 7. I performed this appraisal in conformity with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place as of the effective date of this appraisal, with the exception of the departure provision of those Standards, which does not apply. I acknowledge that an estimate of a reasonable time for exposure in the open market is a condition in the definition of market value and the estimate I developed is consistent with the marketing time noted in the neighborhood section of this report, unless I have otherwise stated in the reconciliation section.
- 8. I have personally inspected the interior and exterior areas of the subject property and the exterior of all properties listed as comparables in the appraisal report. I further certify that I have noted any apparent or known adverse conditions in the subject improvements, on the subject site, or on any site within the immediate vicinity of the subject property of which I am aware and have made adjustments for these adverse conditions in my analysis of the property value to the extent that I had market evidence to support them. I have also commented about the effect of the adverse conditions on the marketability of the subject property.
- 9. I personally prepared all conclusions and opinions about the real estate that were set forth in the appraisal report. If I relied on significant professional assistance from any individual or individuals in the performance of the appraisal or the preparation of the appraisal report, I have named such individual(s) and disclosed the specific tasks performed by them in the reconciliation section of this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in the report; therefore, if an unauthorized change is made to the appraisal report, I will take no responsibility for it.

**SUPERVISORY APPRAISER'S CERTIFICATION:** If a supervisory appraiser signed the appraisal report, he or she certifies and agrees that: I directly supervise the appraiser who prepared the appraisal report, have reviewed the appraisal report, agree with the statements and conclusions of the appraiser, agree to be bound by the appraiser's certifications numbered 4 through 7 above, and am taking full responsibility for the appraisal and the appraisal report.

Asbestos in Libby

### **EPA Action Update #15**

October 23, 2002

### Libby Added to National Priority List

Helena, MT – U.S. EPA Headquarters today has made the decision to list the Libby Asbestos site on the National Priority List - a list of U.S. hazardous waste sites that are eligible for extensive, long-term cleanup under the Superfund program. In January, 2002 Governor Martz used the State of Montana's one-time privilege of naming a site as its highest priority for designation to the NPL.

The Governor's letter, citing the asbestos contamination and consequent health problems, caused the U.S. Environmental Protection Agency to propose Libby to the National Priorities List (NPL) in February, 2002. Today's decision makes the site eligible to receive federal funds for long-term cleanup while EPA seeks to recover costs from the responsible parties. When the Trust fund is used, the State of Montana assumes ten percent of the clean-up costs.

EPA has been at work in Libby since November 1999. In addition to the investigation and risk assessment work, EPA has completed clean-up work at numerous sites in and around Libby that had high concentrations of asbestos such as the former W.R. Grace processing facilities, several Libby schools and several residences. EPA will complete the screening of all Libby homes and businesses by the end of November as planned. In addition to nine residences which cleanup is already complete, 41 additional residences or commercial properties are targeted for cleanup by December 15, 2002. Investigations at the mine site will be minimal until the risks in the town are eliminated.

Information that EPA used to document the proposed listing of the site is available at:

U. S. EPA Records Center 999 18th St., 5th Floor Denver, CO 80202-2466

RE: Property: 30 Parmenter Dr.

Libby, MT 59923

Name: John & Debbie Loomis

File No. DA-603

Case No.

#### Dear Courtney

In accordance with your request, I have personally inspected and prepared an appraisal report of the real property located at:

30 Parmenter Dr.

The purpose of this appraisal is to estimate the market value of the property described in the body of this appraisal report.

Enclosed, please find the appraisal report which describes certain data gathered during our investigation of the property. The methods of approach and reasoning in the valuation of the various physical and economic factors of the subject property are contained in this report.

An inspection of the property and a study of pertinent factors, including valuation trends and an analysis of neighborhood data, led the appraiser to the conclusion that the market value, as of July 1st, 2003 is:

\$ 28,000

The opinion of value expressed in this report is contingent upon the limiting conditions attached to this report.

It has been a pleasure to assist you. If I may be of further service to you in the future, please let me know.

Respectfully submitted,

Tim Rooney
Jay Dinning

#### **GENERAL COMMENT ADDENDUM**

Unless otherwise stated this appraisal was made to determine the estimated market value of the subject property for purchase, finance or settlement purposes. It must not be considered a building inspection. The appraiser can not guarantee that any homes, buildings or other improvements will be satisfactory in all respects or that all equipment will operate properly. A thorough inspection of the property by a reputable home inspection firm may help minimize any problems that could arise. In an existing home, particular attention should be given to plumbing, electrical and roofing components.

Most of the subject area market is not zoned and has little or no tract housing. Historically houses are custom built and are original and unique unto themselves.

This factor and the small number of sales because of the small area population makes it necessary to use comparables that are dissimilar in size, construction, location, etc. Therefore, the adjustments are greater than recommended. This is typical & customary of the subject area.

Because there is little or no tract housing in the area and most homes are and have been custom built, it is necessary that dissimilar properties be used and the adjustments made from a market value approach as the basis for the appraisal; i.e., to determine the estimated market value using the comparable sales approach. It is further necessary that the appraiser use subjective reasoning with the understanding no method of appraising is an exact science. This is typical & customary of the subject area.

In this report, all area sales recorded in last 12 months were analyzed and sales used considered to best represent the market of the subject. Emphasis was placed on comparables deemed by the Appraiser to be most similar or best representative of the subject market.

Lincoln County, in which the subject is located, is that part of northwest Montana along the Idaho-Montana border from the Canadian border south some 60 miles and east 50 miles. It is estimated to be 70% U.S. Forest Service land and 15% owned by large timber companies, etc. Therefore, there is something like 15% private ownership.

The economic base is derived, in the most part, from natural resources of the United States Forest Service.

#### **ENVIRONMENTAL DISCLAIMER ADDENDUM**

Unless otherwise stated in this report, the existence of hazardous materials, which may or may not be present on the property, was not observed by the appraiser. The appraiser has no knowledge of the existence of such materials on or in the property.

The appraiser, however, is not qualified to detect such substances. The presence of substances such as asbestos, urea-formaldehyde foam insulation, molds, and other potentially hazardous materials may affect the value of the property.

The value estimated is predicated on the assumption that there is no such material on or in the property that would cause a loss in value.

No responsibility is assumed for such conditions or for any expertise or engineering knowledge required to discover them.

The client is urged to retain an expert in this field, if desired.

City Libby

Lender/Client USDOT Volpe Center

File No. DA-603

Borrower John & Debbie Loomis

Property Address 30 Parmenter Dr.

City Libby County Lincoln State MT Zip Code59923

Lender/Client USDOT Volpe Center Address 501 Mineral Ave., Libby, MT 59923

The Environmental Protection Agency is currently in the Libby area facilitating the cleanup of asbestos contamination caused by the now closed vermiculite mine. Many homes have been found to contain a higher than normal concentration of asbestos fibers in the homes and yards. In most cases, the cleanup involves removal of the vermiculite insulation in the homes, removal and replacement of carpeting or other improvements to the home, and excavation and removal of the vermiculite laden soils.

In this appraisal, the EPA has indicated to the appraiser that the subject home has been found to contain asbestos fibers intermixed with the plaster walls. The EPA has determined that the cleanup costs to the subject will possibly be in excess of the value of the home. Therefore a complete demolition of the home may be less costly than reparations. This appraisal, and the final opinion of value, has been based on as if the subject home was not on the property and the land, with well, septic and power was exposed to the open market for the typical marketing time for the area.

**DEFINITION OF MARKET VALUE:** The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he considers his own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U. S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions\* granted by anyone associated with the sale.

\*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgment.

#### STATEMENT OF LIMITING CONDITIONS AND APPRAISER'S CERTIFICATION

**CONTINGENT AND LIMITING CONDITIONS:** The appraiser's certification that appears in the appraisal report is subject to the following conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- 2. The appraiser has provided a sketch in the appraisal report to show approximate dimensions of the improvements and the sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size.
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 4. The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.
- 5. The appraiser has estimated the value of the land in the cost approach at its highest and best use and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used.
- 6. The appraiser has noted in the appraisal report any adverse conditions (such as, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property or adverse environmental conditions (including the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.
- 7. The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.
- 8. The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice.
- 9. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that completion of the improvements will be performed in a workmanlike manner.
- 10. The appraiser must provide his or her prior written consent before the lender/client specified in the appraisal report can distribute the appraisal report (including conclusions about the property value, the appraiser's identity and professional designations, and references to any professional appraisal organizations or the firm with which the appraiser is associated) to anyone other than the borrower; the mortgagee or its successors and assigns; the mortgage insurer; consultants; professional appraisal organizations; any state or federally approved financial institution; or any department, agency, or instrumentality of the United States or any state or the District of Columbia; except that the lender/client may distribute the property description section of the report only to data collection or reporting service(s) without having to obtain the appraiser's prior written consent. The appraiser's written consent and approval must also be obtained before the appraisal can be conveyed by anyone to the public through advertising, public relations, news, sales, or other media.

#### APPRAISER'S CERTIFICATION: The Apprai

- The Appraiser certifies and agrees that:
- 1. I have researched the subject market area and have selected a minimum of three recent sales of properties most similar and proximate to the subject property for consideration in the sales comparison analysis and have made a dollar adjustment when appropriate to reflect the market reaction to those items of significant variation. If a significant item in a comparable property is superior to, or more favorable than, the subject property, I have made a negative adjustment to reduce the adjusted sales price of the comparable and, if a significant item in a comparable property is inferior to, or less favorable than the subject property, I have made a positive adjustment to increase the adjusted sales price of the comparable.
- 2. I have taken into consideration the factors that have an impact on value in my development of the estimate of market value in the appraisal report. I have not knowingly withheld any significant information from the appraisal report and I believe, to the best of my knowledge, that all statements and information in the appraisal report are true and correct.
- 3. I stated in the appraisal report only my own personal, unbiased, and professional analysis, opinions, and conclusions, which are subject only to the contingent and limiting conditions specified in this form.
- 4. I have no present or prospective interest in the property that is the subject to this report, and I have no present or prospective personal interest or bias with respect to the participants in the transaction. I did not base, either partially or completely, my analysis and/or the estimate of market value in the appraisal report on the race, color, religion, sex, handicap, familial status, or national origin of either the prospective owners or occupants of the subject property or of the present owners or occupants of the properties in the vicinity of the subject property.
- 5. I have no present or contemplated future interest in the subject property, and neither my current or future employment nor my compensation for performing this appraisal is contingent on the appraised value of the property.
- 6. I was not required to report a predetermined value or direction in value that favors the cause of the client or any related party, the amount of the value estimate, the attainment of a specific result, or the occurrence of a subsequent event in order to receive my compensation and/or employment for performing the appraisal. I did not base the appraisal report on a requested minimum valuation, a specific valuation, or the need to approve a specific mortgage loan.
- 7. I performed this appraisal in conformity with the Uniform Standards of Professional Appraisal Practice that were adopted and promulgated by the Appraisal Standards Board of The Appraisal Foundation and that were in place as of the effective date of this appraisal, with the exception of the departure provision of those Standards, which does not apply. I acknowledge that an estimate of a reasonable time for exposure in the open market is a condition in the definition of market value and the estimate I developed is consistent with the marketing time noted in the neighborhood section of this report, unless I have otherwise stated in the reconciliation section.
- 8. I have personally inspected the interior and exterior areas of the subject property and the exterior of all properties listed as comparables in the appraisal report. I further certify that I have noted any apparent or known adverse conditions in the subject improvements, on the subject site, or on any site within the immediate vicinity of the subject property of which I am aware and have made adjustments for these adverse conditions in my analysis of the property value to the extent that I had market evidence to support them. I have also commented about the effect of the adverse conditions on the marketability of the subject property.
- 9. I personally prepared all conclusions and opinions about the real estate that were set forth in the appraisal report. If I relied on significant professional assistance from any individual or individuals in the performance of the appraisal or the preparation of the appraisal report, I have named such individual(s) and disclosed the specific tasks performed by them in the reconciliation section of this appraisal report. I certify that any individual so named is qualified to perform the tasks. I have not authorized anyone to make a change to any item in the report; therefore, if an unauthorized change is made to the appraisal report, I will take no responsibility for it.

**SUPERVISORY APPRAISER'S CERTIFICATION:** If a supervisory appraiser signed the appraisal report, he or she certifies and agrees that: I directly supervise the appraiser who prepared the appraisal report, have reviewed the appraisal report, agree with the statements and conclusions of the appraiser, agree to be bound by the appraiser's certifications numbered 4 through 7 above, and am taking full responsibility for the appraisal and the appraisal report.

Asbestos in Libby

### **EPA Action Update #15**

October 23, 2002

### Libby Added to National Priority List

Helena, MT – U.S. EPA Headquarters today has made the decision to list the Libby

Asbestos site on the National Priority List - a list of U.S. hazardous waste sites that are eligible for extensive, long-term cleanup under the Superfund program. In January, 2002 Governor Martz used the State of Montana's one-time privilege of naming a site as its highest priority for designation to the NPL.

The Governor's letter, citing the asbestos contamination and consequent health problems, caused the U.S. Environmental Protection Agency to propose Libby to the National Priorities List (NPL) in February, 2002. Today's decision makes the site eligible to receive federal funds for long-term cleanup while EPA seeks to recover costs from the responsible parties. When the Trust fund is used, the State of Montana assumes ten percent of the clean-up costs.

EPA has been at work in Libby since November 1999. In addition to the investigation and risk assessment work, EPA has completed clean-up work at numerous sites in and around Libby that had high concentrations of asbestos such as the former W.R. Grace processing facilities, several Libby schools and several residences. EPA will complete the screening of all Libby homes and businesses by the end of November as planned. In addition to nine residences which cleanup is already complete, 41 additional residences or commercial properties are targeted for cleanup by December 15, 2002. Investigations at the mine site will be minimal until the risks in the town are eliminated.

Information that EPA used to document the proposed listing of the site is available at:

U. S. EPA Records Center 999 18<sup>th</sup> St., 5<sup>th</sup> Floor Denver, CO 80202-2466 Tel: 303-312-6473
